

## Faculty Members – registered users at Intinno

Intinno has been used at IIT Kharagpur since the Spring semester of 2007-08 session. The number of faculty members who have been using Intinno for course management is on a rise. Intinno is committed to enhancement of user-experience especially for the faculty members. Intinno aims to provide a simple, intuitive, yet powerful way to manage courses online so that faculty can save a lot of time on the mundane administrative tasks and provide the students a modern learning experience.

## Usage Statistics at IIT Kharagpur – Spring 2009 (upto 20 February 20, 2009)

The usage statistics are given for the most widely used modules of Intinno viz.-

1. **Assignments** – post assignment questions to be viewed online, optional online submissions
2. **Lectures** – share lecture notes, conduct scribing of notes online
3. **Resources** – additional material for the students online
4. **Announcements** – inform the members of a course via email and instant messages (and optionally SMS)

Apart from these modules, all of courses have Discussion or Question-Answer Forums by default, where student post questions and answers as a part of discussion.

Recently, the **Quiz Module** which was added, was used to conduct two class tests in Supply Chain Management (VGSoM, Prof. Gautam Sinha), wherein an objective type test of 60 questions each where administered to a batch of 70 students and the results of the test were available immediately to the students. The quiz module can be used to conduct class tests (administering multiple choice, true/false, numerical, textual/reasoning type questions) for a large class in a hassle free manner.
